INTRODUCTION

Patient's medical records is an app related to the medical records stored at one place digitally.

It is an existing app in USA where almost 70% of the civilians are using EMR(Electronic Medical Records) app.

NEED FOR PMR

- To store all the medical records of the patient at one place.
- Records to be maintained for longer periods.
- To reduce the customers' strain for getting medicines.
- To make easy access to patient about their medical record.

FEATURES & ADVANTAGES OF PMR

- ❖ Convenient to carry.
- ❖ Maintains every small detail of medical treatment.
- ❖ Can be used in different hospitals.
- ❖ Contains past medical records.
- ❖ To know which practitioner treated the patient.
- ❖ Reduces the risk of mistreating the drugs to patients.
- ❖ Proper guidance to the practitioner about the past medical diagnostics.
- ❖ Knows about the location and address of the pharmacist.

USEFUL FOR

PMR is an inline application that is useful for all the age groups of people. They are simply need to signup in the app through mobile. It is used especially for middle aged because of their daily responsibilities and along with pregnant women as they can get ease from carrying the medical records every time they visit hospital.
